

## Environmental Policy

“Be the first choice construction and maintenance contractor by providing exceptional customer care for the discerning client.”

Adamson Construction believes that businesses are responsible for achieving good environmental practice and operating in a sustainable manner. As a consumer of resources Adamson Construction recognises its responsibility to future generations and is committed to the protection of the environment including the prevention of pollution and minimisation of resources usage and waste production. Acknowledging its contribution to the growing global environmental burden, it will follow business practices that promote sustainable development and mitigation of the climate change. Adamson Construction will fulfil its compliance obligations to promote sustainable development.

All employees and sub-contractors are expected to co-operate with Adamson Construction in the implementation of this environmental policy and will ensure that their own work, so far as is reasonably practicable, is carried out with minimum risk to the environment.

It is the duty of Adamson Construction to ensure that good environmental management is practised in all projects it is involved in and the company will seek to influence customers to demonstrate a positive environmental commitment. Objectives will be set and regularly monitored to ensure the company is performing at the required standard. The policy will be reviewed annually and updated as required to conform to current legislation and it will be available to all interested parties.

The Managing Director is personally responsible for the environmental performance, continual improvement of the environmental management system to enhance environmental performance of the Company and signs this policy statement in acknowledgement of this.

Signed for and on behalf of Adamson Construction  
**Adam Treacher - Managing Director**
